

DECLARATION OF FOOD COMPLIANCE

We hereby declare that the item provided:

Polypropylene filtering cartridge

reference code *910-0018-000*
 910-0017-000
 910-0016-000
 910-0015-000
 910-0040-000

MANUFACTURING MATERIAL

Filtering separator: polypropylene
Support and drainage dividers: polypropylene
External box, terminals: polypropylene
Central part: polypropylene
Standard O-Ring: silicon

General requirements

Complies with the following European Union (EU) legislation:

- Regulation (EC) No. 1935/2004 and subsequent updates and changes;
- Regulation (EC) n° 10/2011 of 14/01-2011 Commission, regarding plastic made materials and objects destined to food contact (MOCA)
- Regulation (EC) No. 2023/2006 and subsequent updates and changes;

Complies with the following Italian legislation:

- D. M. 21/03/1973 and subsequent updates and changes;

The filtering cartridges above-mentioned have to be used for alcoholic and not alcoholic liquid products up to 40°C. It is specified that the parts in direct / indirect contact are indicated in the technical documentation present in the Company.

Tests have been made in conformity with Regulation (EC) n.10/2011 (attachment V)

Intended use specification or restrictions:

Types of foods for which the material is suitable

It is suitable for all foods for which it is required a test with B1 and D1 simulants

Types of foods for which the material is not suitable

Oils and greasy products.

Metal parts

The metal ring support (optional) is alimentary stainless steel made; EN1,4404 (316L) (DM 21/03/1973)

Rubber parts

In absence of a European harmonized standard, rubber O-ring conformity is based of the following standard:

DM: 21-03-1973

DM 8-02-995

Product traceability is guaranteed by regulation (EC) n. 1935/2004 with the number printed on the packaging and on the filter.

Is case of uses different from the intended.
